### **DETAILED ACTION**

This Office action is in response to the amendment filed January 5, 2005 in which claims 1-13 were amended and claims 14-57 were added. The previous rejection of the claims is withdrawn in view of the amendment to the claims.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-57 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The components (a), (b) and (c) are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). At page 3, line 1, Applicant discloses that all of the components are essential to the invention. However, given that both components maybe present in an amount from 3-20 %, component (c) may completely replace component (a).

3. Claim 14 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the specification for component (b) having a boiling point in the range from about 244 to 300 C.
